To Whom it May Concern:

It is my pleasure to recommend Brendan Racca for your internship program. I have known Brendan since he was a student in my 10th grade English Language Arts class at Clovis East High School.

Brendan is an intelligent young man, whether it be in core academic subjects or computer technology. I have watched Brendan face educational challenges through which he has chosen to learn and grow, and though these experiences he has been able to achieve his educational goals while striving for excellence in his craft. He now desires to apply his hard work in technology to meet the ever-increasing demands of society. I am confident that Brendan has the potential to have a positive impact on those with whom he interacts, as well as within the industry in which he desires to work.

Having had Brendan as a student during his Sophomore year I am able to speak to his creative and intellectual growth. He has demonstrated the dedication to learning and improvement that educators desire to see. Brendan has sought instructional guidance while he remained receptive to correction. He has proven himself to be an intelligent and creative student who brings focus and a positive attitude to the classroom.

Brendan is an excellent choice for your computer science internship program. He has personal experience creating his own website and video game, and with his friendly demeanor, he will be able to meet the continually increasing technological demands of society. I recommend Brendan Racca for admission to your program. Should you have further questions, please feel free to contact me using the information on this letterhead.

Sincerely,

Mrs. Anna Capper, M.A., T.
